

Manifesto for Academic Rep

Hello all,

I would like to run for academic rep. I consider myself a good listener and a highly motivated person; good qualities for this role. Given that we are a faculty based subject, I think that this is a particularly important job because it provides communication between students and course directors. This is essential for furthering the academic opportunities available to us.

In my opinion, the most important task is to listen to the views of all pre-clinical students and then engage with the directors over any issues raised, seeking to provide the best possible arrangements for all. I recognise the importance of finding ways to enable us to make the most of our years in Oxford. For me, talking to other students would be one of the highlights of this position. I would love to meet more of you and find out how you think things could be improved, and this would be a great opportunity to do so.

As well as providing a channel for your opinions, there are some changes that I think would benefit us all. I feel that Web learn can be improved in a number of ways, including the addition of more lecture notes, especially second year lectures notes and by giving the answers to the anatomy and histology practical books. Secondly, I would like to increase the number of revision materials available, for example, by introducing DR revision sessions and by creating a guide on what the examiners are looking for. Thirdly I would like to invite more speakers to come and give presentations about the opportunities open to all during electives and after university.

Thanks for taking the time to read this, I hope you will consider me for academic rep.

Georgina
